KICKSTARTER

## Next-Gen Color Night Vision

Not every technology can achieve the level of Next-Gen Color Night Vision.

The most advanced sensors and lenses are not enough to produce truly stunning visuals. It also requires a chip with exceptional data processing capacity and sophisticated image algorithms for dynamic superimposition. All four elements must be present to achieve perfect true color night vision, and KAWA T6 & T6 pro security cameras have them all. No need for extra lighting, KAWA T6&T6 pro security cameras can display the dark natural environment like it's daytime.

KAWA T6 & T6 pro security cameras will launch on **Kickstarter**, will you be the first person to try tomato?

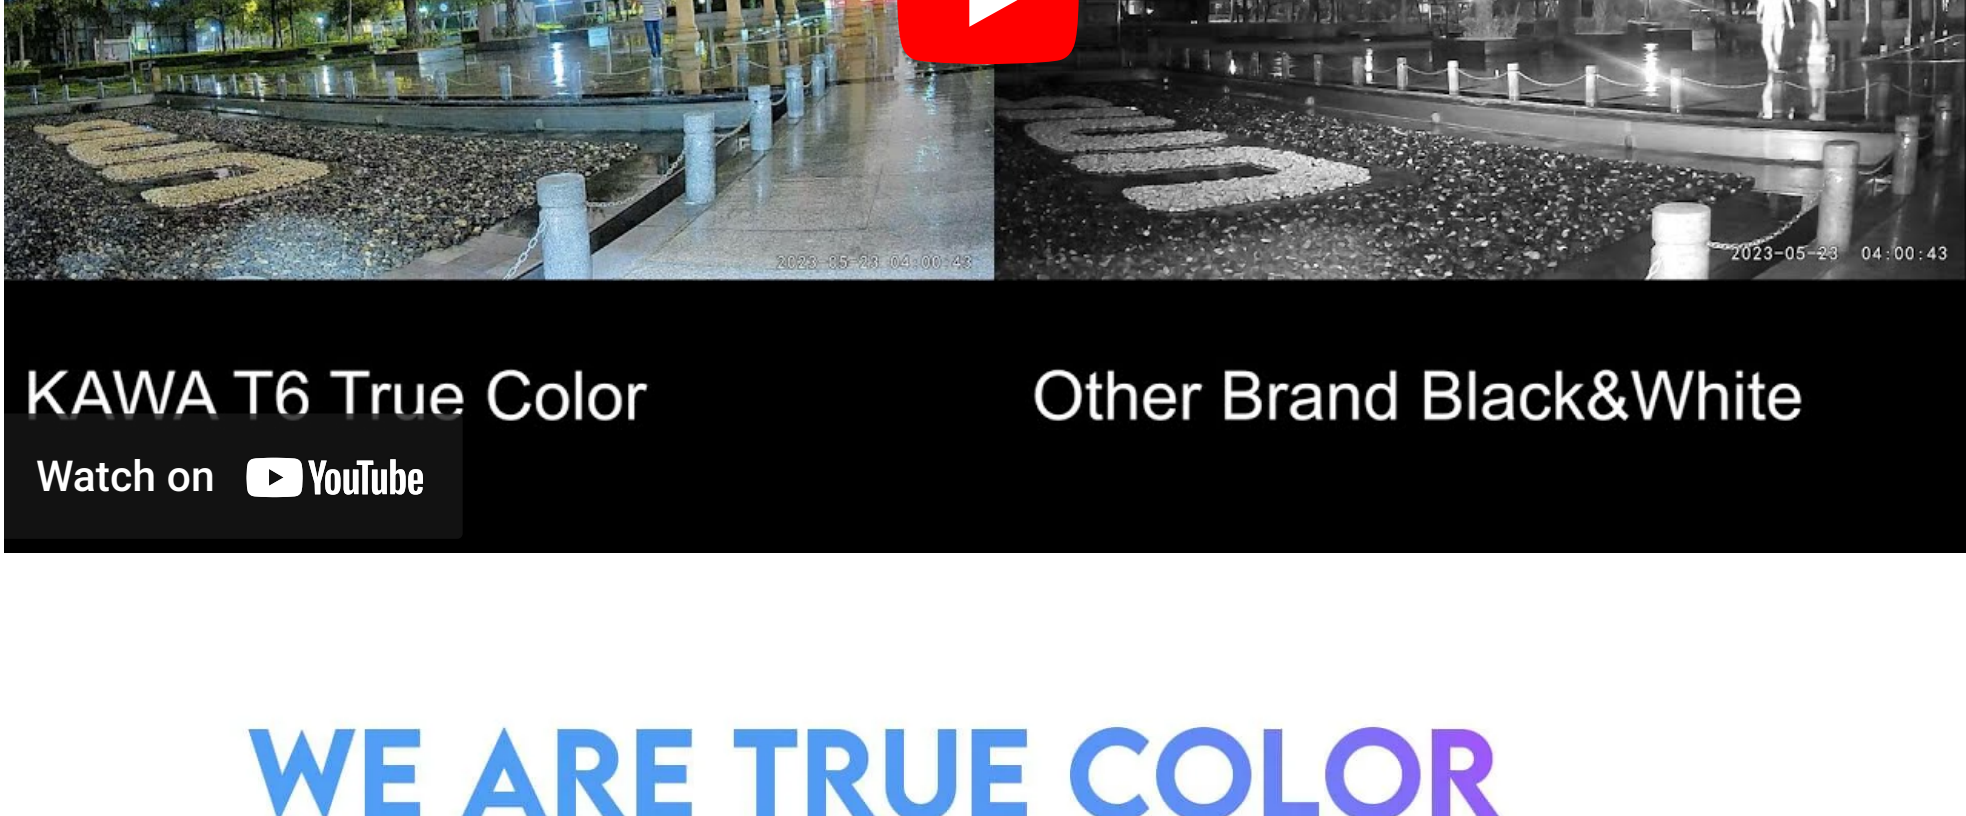

NEXT-GEN COLOR NIGHT VISION

## The Legend Begins: Introducing the New Era of True Color Night Vision with KAWA T6 & T6 Pro Security Cameras

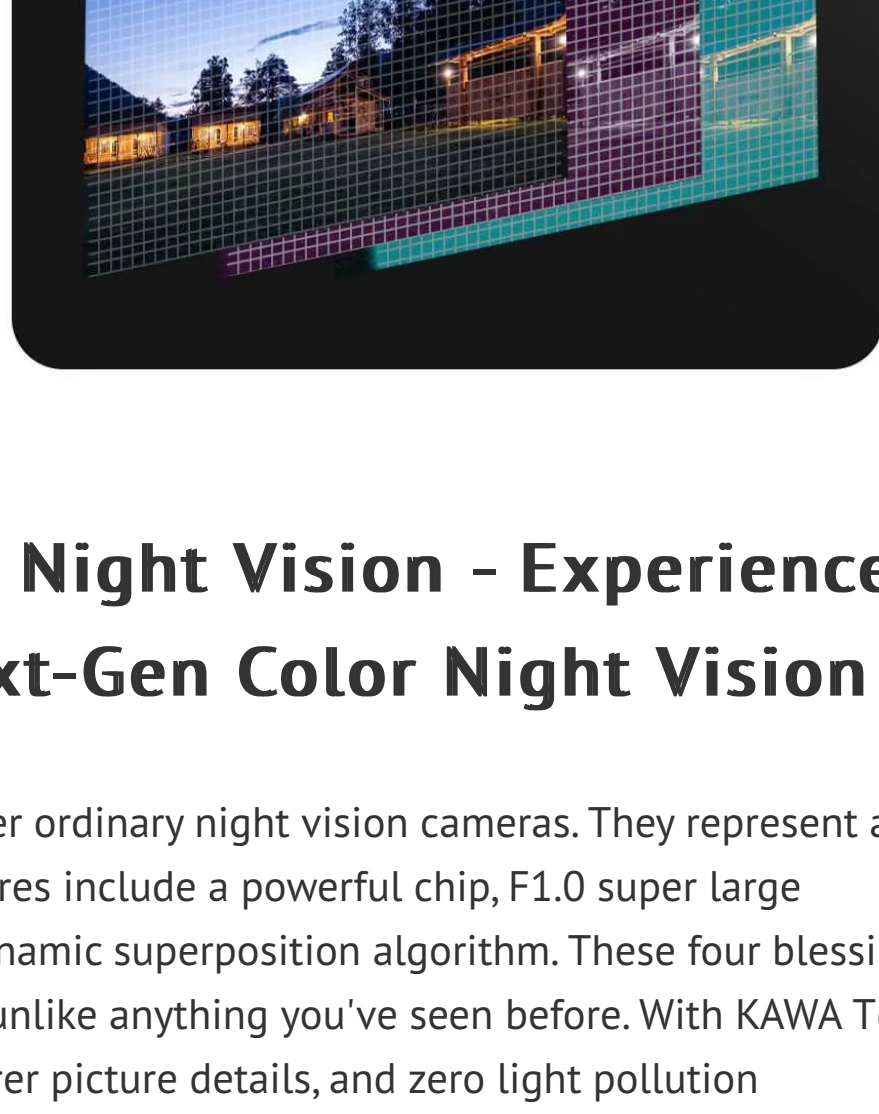

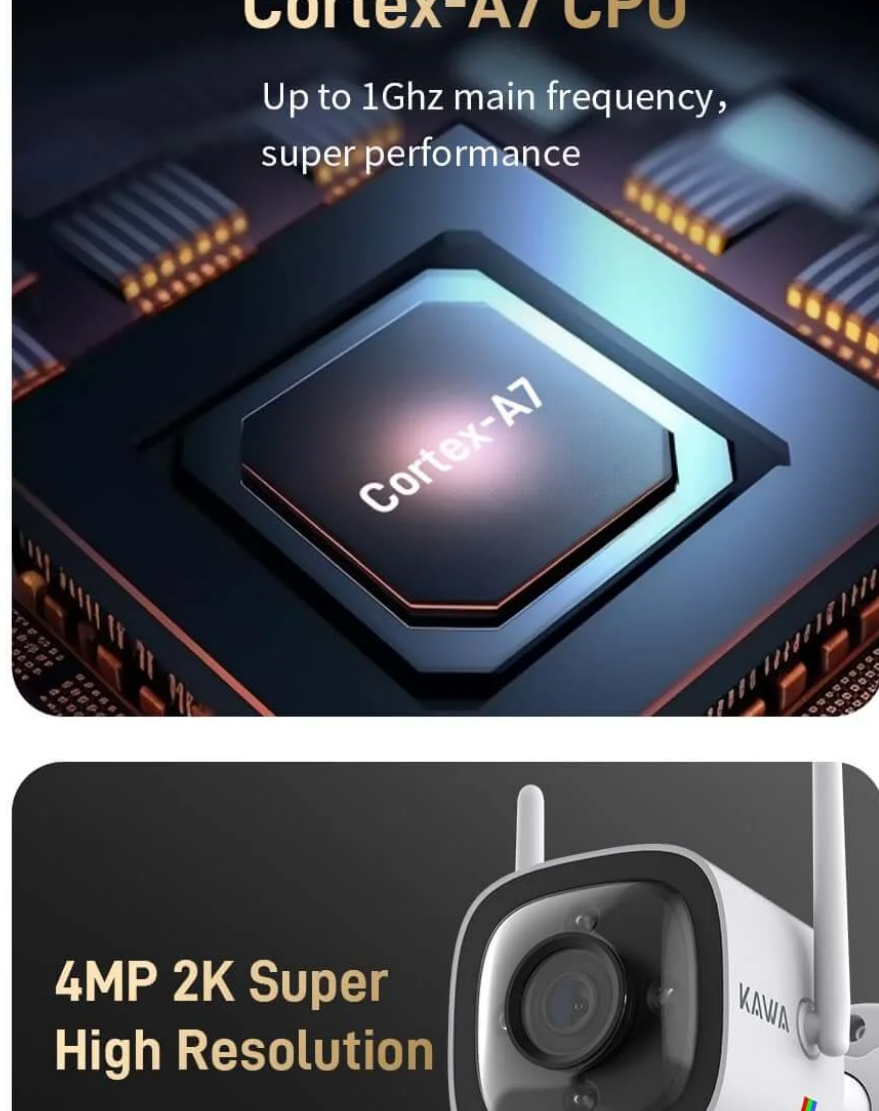

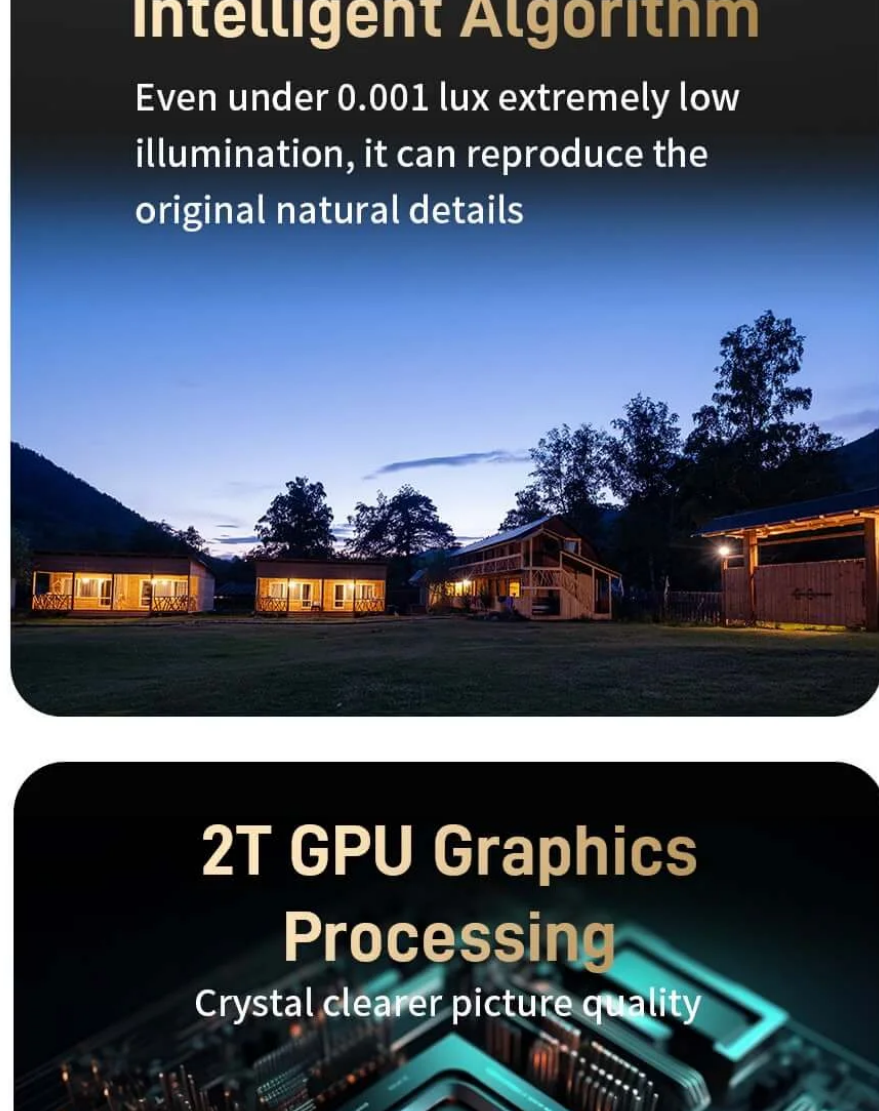

KAWA T6&T6 pro security cameras are capable of displaying true color night vision in dark environments using only weak natural light, providing a daytime-like effect. The night vision range is wider, the picture details are clearer, and there is no interference from light pollution.

Please choose the high quality on the below YouTube Setting  to enjoy the better video effects.

*The video was filmed at 4:00 A.M..*

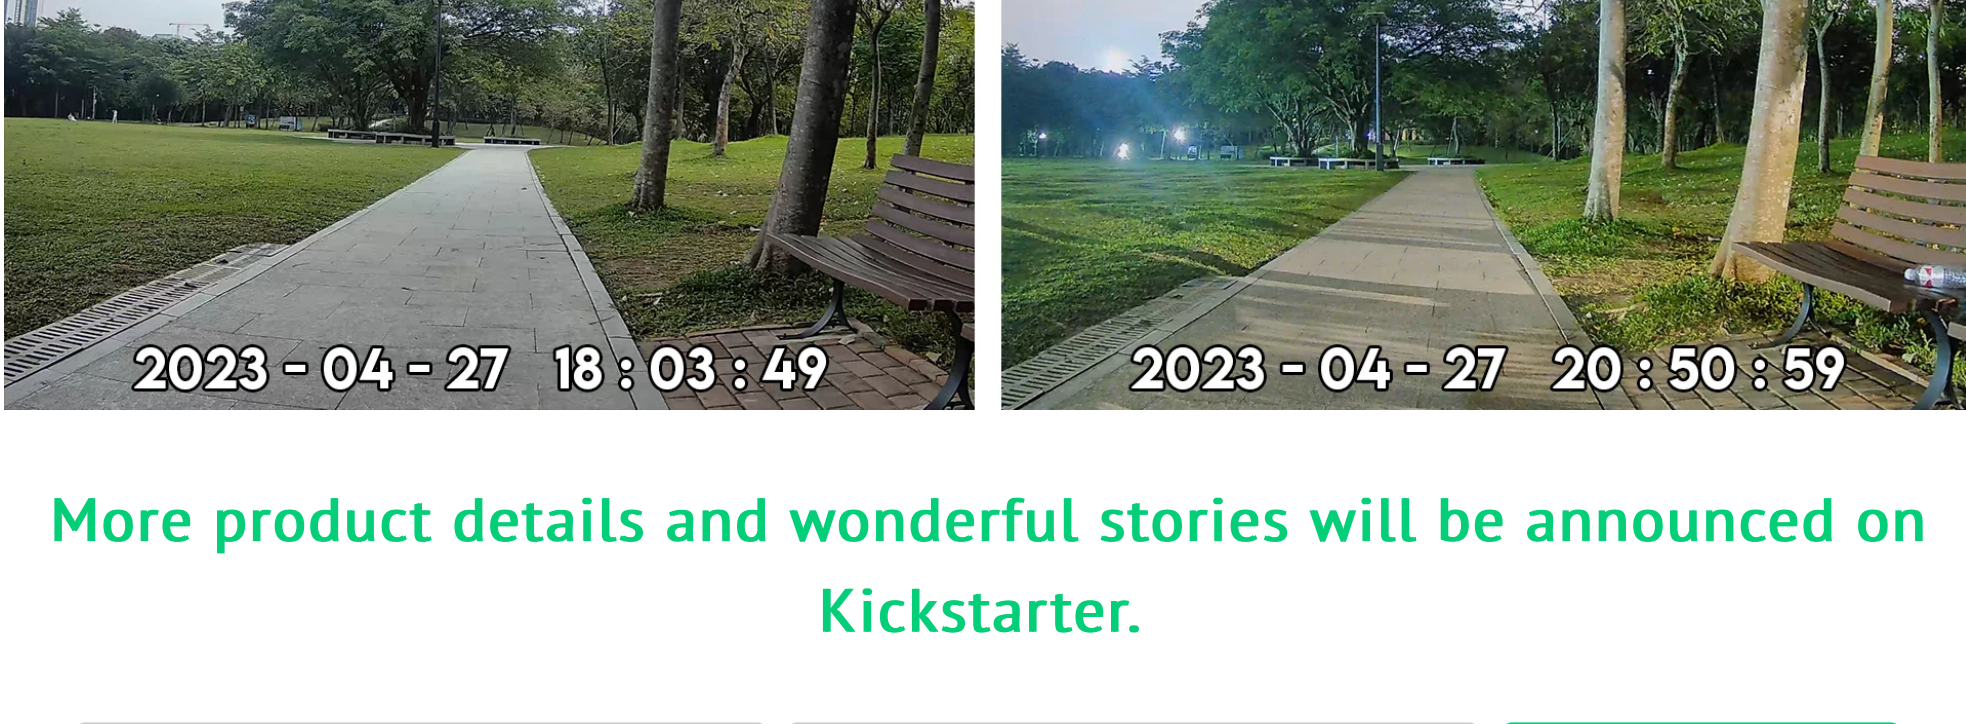

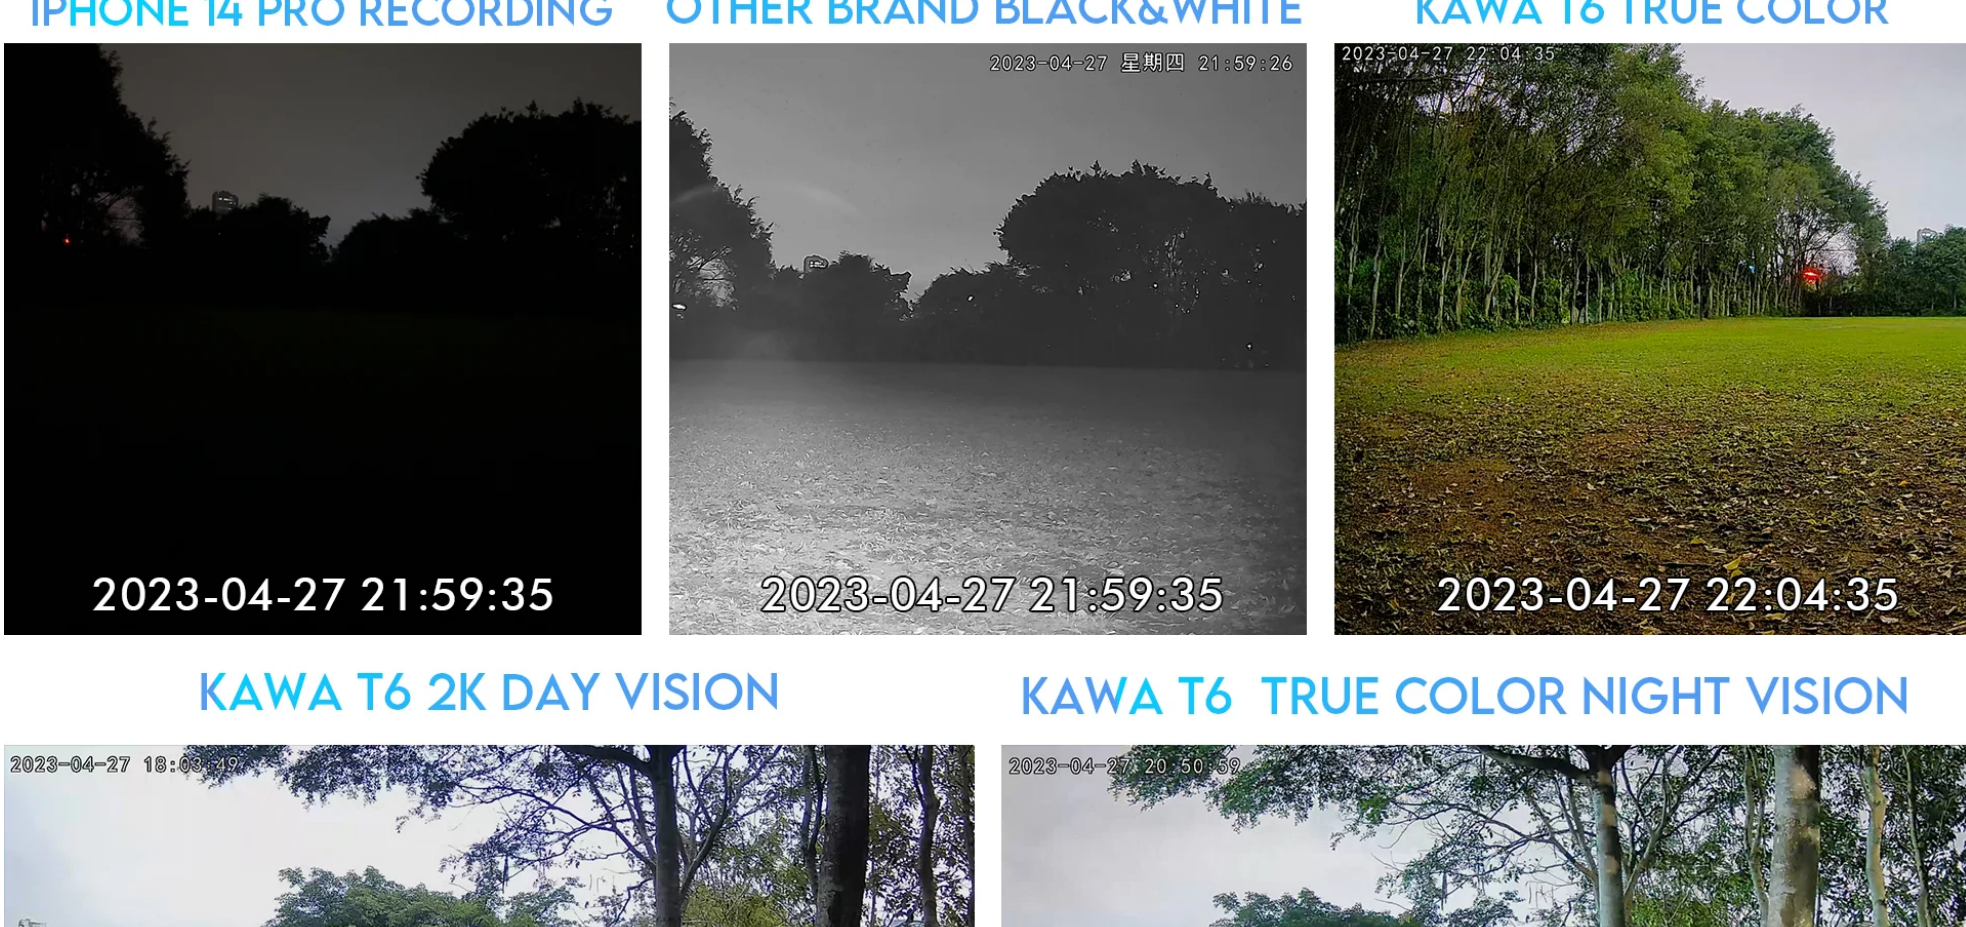

## WE ARE TRUE COLOR NIGHT VISION SPECIALIST.

## Say Goodbye to Traditional Night Vision - Experience the KAWA T6&T6 Pro's Next-Gen Color Night Vision

KAWA T6 & T6 pro security cameras are not just another ordinary night vision cameras. They represent a new era in night vision technology. The advanced features include a powerful chip, F1.0 super large aperture, quad-core Cortex A7 CPU, and multi-frame dynamic superposition algorithm. These four blessings work together to deliver true color night vision that is unlike anything you've seen before. With KAWA T6 & T6 pro, you'll experience wider night vision range, clearer picture details, and zero light pollution interference.

More product details and wonderful stories will be announced on **Kickstarter**.
